MUBY A/C RECHARGE STATION

A/C
Recharge Station

Muby is an advanced air conditioning recharge machine developed by TREDLAB, engineered for fully automatic servicing of vehicle A/C systems. The system provides precise pressure monitoring in both analog and digital formats, enabling accurate and detailed diagnostics of the climate control system, with remote access capabilities via smartphone and tablet.

It features a scale calibration function that does not require cylinder removal or component disassembly, enhancing operational efficiency and reducing service time.

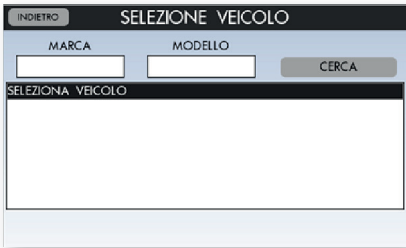

Designed for automotive industry professionals, MUBY A/C offers a high-precision, user-friendly platform that supports superior performance in the maintenance and servicing of vehicle air conditioning systems.

A/D pressure control and full automation

Complete database integrated

Balanced offset without removal

The fully integrated database in Muby A/C provides accurate and up-to-date information for every vehicle type, enhancing service efficiency and quality.

Available for
r134 and
r1234yf
